

how to love

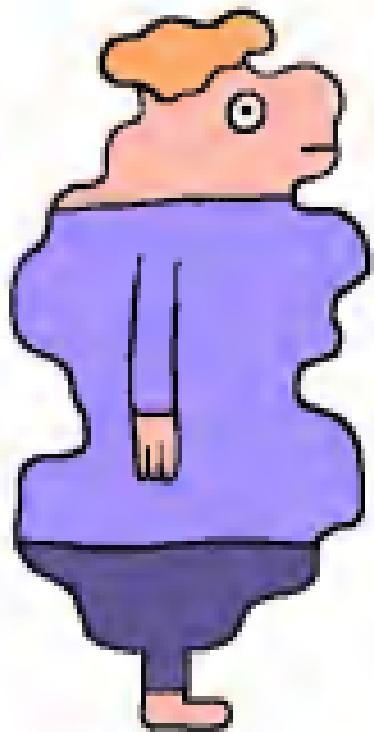

dear dorris,

my ex-girlfriend always said
I was right for her, but I
didn't think she was right,
so I ended it. What makes
someone "right"?

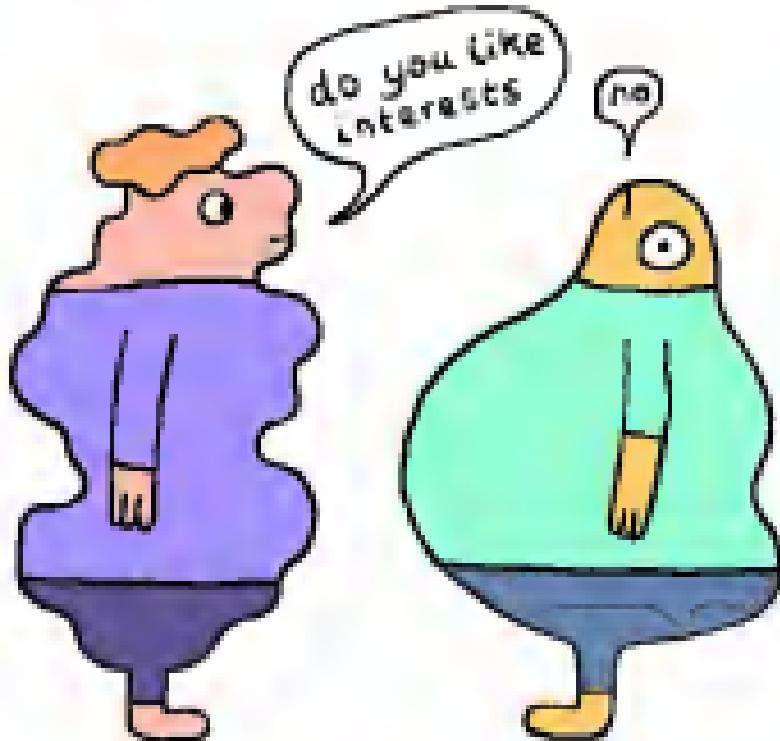

someone

- burrito-baby

We are all complicated blobs

and it can be challenging to find another blob who fits.

We will never find a blob
who is exactly right

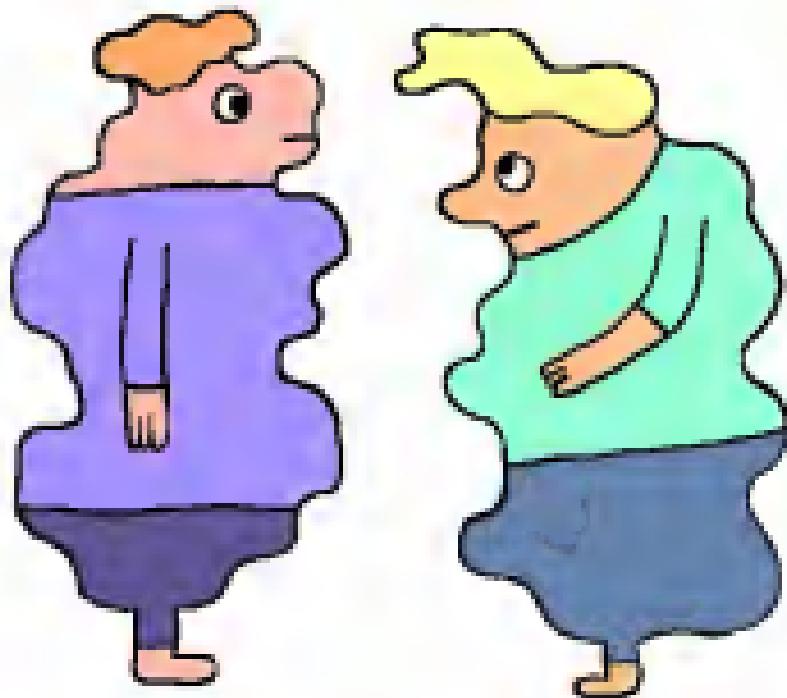

and sometimes two blobs fit

but one blob doesn't feel right

but if we find a blob
who somewhat fits

and it feels right

then it is right.
